## **xx. Teaching Learning Process**

### **TEACHING METHODOLOGY**

There are different types of teaching methods which can be categorized into three broad types. These are teacher-centered methods, learner-centered methods, content-focused methods and interactive/participative methods.

#### **(a) INSTRUCTOR/TEACHER CENTRED METHODS**

Here the teacher casts himself/herself in the role of being a master of the subject matter. The teacher is looked upon by the learners as an expert or an authority. Learners on the other hand are presumed to be passive recipients of knowledge from the teacher

#### **(b) LEARNER-CENTRED METHODS**

In learner-centered methods, is a teaching approach in which students actively participate, discuss, explore, and learn by doing, while the teacher acts as a guide or facilitator.

#### **(c) CONTENT-FOCUSED METHODS**

In this category of methods, both the teacher and the learners have to fit into the content that is taught. Generally, this means the information and skills to be taught are regarded as sacrosanct or very important. A lot of clarity and careful analyses of content. Both the teacher and the learners cannot alter or become critical of anything to do with the content.

#### **(d) INTERACTIVE/PARTICIPATIVE METHODS**

This fourth category borrows a bit from the three other methods without necessarily laying emphasis unduly on either the learner, content or teacher. These methods are driven by the situational situation domains and of analysis learner's factors.
